Restyling

with 3M™ DI-NOC™
Architectural Finishes

3M DI-NOC™ delivers everything you need from a surface finish. Light weight, flexible and with a hard-wearing pleasing appearance.

The patterns offer good flame retardant levels, together with excellent resistance to water, dirt, and general wear and tear.

Furthermore, thanks to an integrated system of invisible grooves allowing air to escape, the patented 3M Comply™ technology simplifies installation making it faster and more fluid.

Nothing needs to be dismantled, everything can be transformed: furnishings, benches, desks, side tables, doors, dividing walls, false ceilings, lifts, woodwork.

And the greatest advantage for clients is that the work can almost always be done without having to shut up shop!

The new 3M DI-NOC™ Collection 2018-2020 is even broader and more complete to be at the cutting edge and aligned to new trends in the world of interior decoration.

Make your spaces extraordinary!

3M DI-NOC™ adhesive laminates are an innovation and a source of inspiration for your creativity, enabling you to transform projects into reality with huge application potential

Reference markets

In the vast market of space renovation, customization, flexibility, speed of completion, optimization of budget and, obviously, quality, this requires the greatest attention when choosing the best products and solutions.

3M™ DI-NOC™ adhesive surface finishes are the best response to these types of requirements, created and perfected over more than 70 years of production.

Thanks to their characteristics of adaptability, top level materials and colours, they are suitable in all contexts, ranging from contractual to medical, and retail to boats.

The quality of this product is well known for its technology, design and efficiency, essential parameters in the hospitality and catering sector. 3M™ DI-NOC™ adhesive finishes are anti-bacterial, fire-proof and easy to clean, all basic requirements in settings designed to accommodate the public. The main feature of the 3M™ DI-NOC™ solutions is its simplicity and speed compared to traditional restructuring techniques.

Renovation, in fact, is carried out in a dry working environment without using invasive equipment or noisy tools that would be incompatible with normal business in public places.

This means that business owners are guaranteed continuity in their places of work, avoiding temporary closures and consequent loss of earnings.

Entertainment and a stimulating atmosphere; this is the leverage used by retailers to ensure the attractiveness of their shops to customers during the process of buying goods and services. Today's consumers look to be welcomed into a place that is comfortable and tidy, with enough space to move around freely. However, in the process of renovation of a commercial business, the time and budget available are often an obstacle.

3M™ DI-NOC™ adhesive finishes for retail combine flexibility and ease of installation. They are low maintenance, but maximum impact!

They can be applied on all surfaces in a shop, from the furnishings to the ceilings, the walls to the windows, including all furnishing accessories.

SURGERIES

PUBLIC AREAS

FE-813

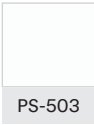

In the Health Care industry, hygiene and cleanliness are essential. As a result, it is important to offer solutions, products and materials that are dirt repellent and resistant to water, impact and wear and tear.

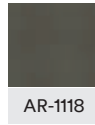

It has been proven that venues that are more welcoming in their colour and design greatly improve the productivity of medical personnel, as well as creating a feel-good factor for patients. The welcoming atmosphere further reduces

the perception of medicalisation and this positive image in hospitals and clinics contributes greatly to creating an atmosphere of trust and partnership between patients and medical staff.

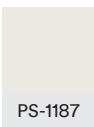

3M DI-NOC™ adhesive finishes for Health Care provide extremely high levels of performance with maximum safety and help to transform areas that are commonly anonymous and neutral into spaces that are cheerful and comfortable.

MARINE

The leisure boat market is a privileged catalyst of current and futuristic technologies. Similarly, it is a summary of varied experiences, ranging from the search for "luxury" to the affection that often develops between a boat and its owner.

3M DI-NOC™ adhesive finishes are a revolutionary technology in the field of ultra-light adhesive laminates, which perfectly reproduces many materials, both in look and to the touch. Extremely flexible finishes, specific for renovating and restyling all surfaces, including 3D.

PRODUCTS

3M™ DI-NOC™ EXTERIOR

3M DI-NOC Exterior is a new Adhesive Finish developed for application on outdoor facades. Durable, stable in dimension, it is weather-resistant and is guaranteed for 10 years. These decorative finishes provide the warmth of wood grain, an elegant metal sensation, the essence of freshness for natural stone and pure colours.

The 3M DI-NOC Exterior series can be applied directly onto smooth, non-porous surfaces, such as aluminium, stainless steel, and painted metal. The main features of 3M DI-NOC Exterior adhesive finishes are their simplicity and speed of completion, significantly reducing work site costs.

3M DI-NOC Exterior Features

Guarantee	10 years outdoors
Uses	Renovation of facades, frames, doors, columns and much more
Surfaces	Metallic
Pattern	Wood, metal, stone and solid colours
Finishes	Over 100
