

A revolution in interior design.

3M™ DI-NOC™ Architectural Finishes

An innovative, flexible design solution for refurbishment.

Breathe life into outdated fixtures and get creative flexibility on your new projects with 3M™ DI-NOC™ Architectural Finishes.

With over 1000 patterns to choose from, the design options are virtually limitless. These dynamic finishes transform spaces and can be applied almost anywhere: from walls and ceilings to fittings, furniture and doors. With a sophisticated, high-end look that will last up to 12 years, they're durable and let you revitalise any space.

DI-NOC Architectural Finishes are quick to install and more cost effective than traditional

refurbishment methods as well as being less labour-intensive and wasteful. DI-NOC finishes are up to ten times more wear-resistant than paint and wood.*

Easy to clean and quick to repair, DI-NOC finishes are a low-maintenance, low-weight alternative to heavy-duty woods, metals, resins and plastics. If scuffed or damaged, they can be quickly repaired without the need to replace the entire panel or product. DI-NOC finishes are also a sustainable solution and may qualify for LEED certification credits.

*Test methods and results available on enquiry to ukcommercialgraphics@mmm.com

Healthcare

Revitalise healthcare spaces hygienically and with minimal disruption using 3M™ DI-NOC™ Architectural Finishes. They can be cleaned with disinfectant or medical grade cleaners and most stains can be removed with water or a mild cleaning solution. Their durability and repairability makes them ideal for high-traffic areas, especially ones at risk from scuffs and bumps from wheelchairs, trolleys and stretchers.

DI-NOC Architectural Finishes can be easily installed over outdated fixtures and fittings without the need for noisy machinery, resulting in less disruption to services so you can keep your doors open to patients throughout the refurbishment process.

With over 1000 patterns, DI-NOC finishes help you curate a welcoming, relaxing space for everyone who enters the hospital. Well-designed medical spaces make patients feel at ease, encouraging healing and resulting in shorter

hospital stays. DI-NOC finishes can also be used for dedicated wayfinding design, delineating departments and wards by providing colourful visual cues on doors, walls, fixtures and lifts.

Revitalise your interior spaces and bring old fixtures back to life with DI-NOC finishes. Register for a sample, request a call from an expert or find your local 3M endorsed installer at www.3M.co.uk/architectural.
